👤 PROFILE

INSA Toulouse graduate Software Engineer. I am a full-stack developer passionate about designing end-to-end web applications, on both the server side and the user interface. Specialized in Java / Spring Boot on the server side and Angular / TypeScript on the client side, I build performant, maintainable, and user-centered solutions. Curious and rigorous, I am eager to put my technical skills to work on concrete, high-impact projects.

🧠 TECHNICAL SKILLS

Programming Languages

Java, TypeScript, JavaScript, Python, SQL.

Back-end

Spring Boot, API REST, JWT/Spring Security

Front-end

Angular, HTML/SCSS

Databases

PostgreSQL, MySQL

DevOps & Tools

Docker, Git, Kubernetes, Maven

🌐 LANGUAGES

Arabic: Native

English: Fluent

French: Fluent

Spanish: Intermediate

📜 CERTIFICATIONS

TOEIC 895/990: Advanced Level

🔧 PROJECTS & PROFESSIONAL DEVELOPMENT

01/2025 – Today

- **Personal portfolio website:** design and deployment of a portfolio site in Angular 21 (standalone components, signals, SCSS), with an integrated contact form, deployed on Netlify with a custom domain (achraflaazizi.dev).
- Self-taught deepening of the **Spring Boot** ecosystem (modern REST, JPA/Hibernate architecture) and **Angular / TypeScript**.
- Regular practice of **algorithms and data structures** through problem-solving (LeetCode).
- Building expertise in modern development tools and practices: **Docker, CI/CD, JUnit, Maven**.

👔 PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER – FINAL-YEAR PROJECT,

Société Nationale de Radiodiffusion et de Télévision (SNRT)

02/2024 – 09/2024 | Casablanca, Morocco

Complete overhaul of the Botola platform (Moroccan football league), from **front-end** to **back-end**, including a user-log collection and analysis system to personalize content and improve the user experience.

- Designed the technical architecture and developed the back-end (**Spring Boot, REST API**) and front-end (**Angular**).
- Designed and managed the database, with code review, optimization, and **unit testing**.
- Built a **user-log** collection and analysis module, then handled **deployment** to validate **performance**.

SOFTWARE DEVELOPER – INTERNSHIP, Eurafric Information

04/2022 – 07/2022 | Bouskoura, Morocco

- Developed a **Java** application for centralizing and monitoring system configurations, with optimized data extraction.

🎓 EDUCATION

INSA Toulouse – Institut National des Sciences Appliquées,
Engineering Degree in Computer and Networks Engineering

09/2018 – 09/2024

Multi-campus path (Fès, Blois, Toulouse) focused on web development and software engineering, with a specialization in information systems and an introduction to agile project management.

🔑 INTERESTS

Mathematics & Science, Philosophy, Singing & Music, Audiovisual, Video Games, Weightlifting & Football
